FTS UL LISTED MULTI-COMPARTMENT STORAGE TANK

FTS Multi-Compartment Fibreglass Tanks are available in Single Wall or Double Wall and feature a choice of two or three completely separate compartments within the one tank *-another innovative product from FTS*. The ability to store unleaded, premium unleaded and diesel fuel in one tank provides an attractive alternative, meeting the challenges of multi-product storage. FTS Multi-Compartment Tanks are available in a wide variety of sizes, providing further choices to meet the needs of today's owner/operator.

INCREASED SAVINGS

FTS Multi-Compartment Tanks increase savings as well as storage capacity.

- Some insurance companies may charge their premiums on a per tank basis. Therefore owner/operators may only need to pay one premium for up to three different products stored.
- Smaller excavated area, for the same amount of storage, saves on installation costs.
- Some governing agencies may charge fees/permits on a per tank basis. With FTS Multi-Compartment Tanks, the owner/operator may only need one permit instead of two or three.

STRONG AND DEPENDABLE

The unique integral rib design of FTS Multi-Compartment Fibreglass Tanks makes the vessel one of the strongest underground petroleum storage tanks available, when correctly installed.

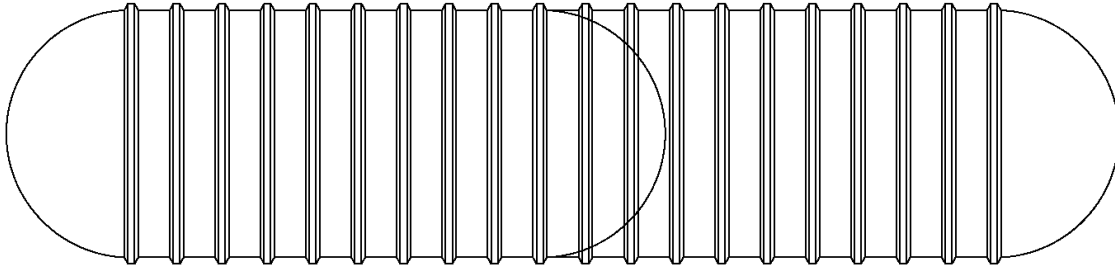

FTS Multi-Compartment Fibreglass Tanks do not rust consequently they are the safest protection against leakage. FTS Multi-Compartment Fibreglass Tanks do not require cathodic protection, exterior coatings, or periodic maintenance, often required by Federal EPA, State and Local regulations for non-fibreglass tanks.

STRONG AND DEPENDABLE

All FTS Multi-Compartment Tanks are made with fittings placed on a made-to-order basis:

- Lifting lugs are provided for handling ease
- Striker plates are standard under each opening
- Access manways and fittings can be installed to meet most requirements.

DIMENSIONS AND CAPACITIES

For Tank Dimensions and Details –
Please refer to the FTS Fibreglass Single Wall or Double Wall Technical Data Sheet

Custom manufactured tanks can be supplied upon request
