**A variety of sockets, pipes and flanges can be fitted to suit all requirements.**

**Suitable for Petroleum Products including those containing Ethanol and Chemicals**

# Double Wall Fibreglass Underground Tanks

FTS Double Wall Fibreglass Underground Tanks are fitted with the Truchek Hydrostatic Monitoring system for leak detection. This meets EPA requirements and provides ongoing monitoring and protection from product loss and contamination of the environment.

Due to Fibreglass Tanks being lightweight they can be delivered complete and ready to install which greatly reduces installation time and effort.
